

Finding a sickle cell patient's pain plan in the Emergency Department

1

Find a patient's Universal Care Plan

Emergency Department (ED) users can access the UCP through their **browser** or in-context via the **London Care Record (Cerner HIE)**.

A

Browser:
UCP web Portal
london-scpa-hscn.better.care

Search for the patient using their name or identifier.

B

In-context:
London Care Record
(Cerner HIE)

Open the patient's record. Navigate to the 'care plans' widget and select 'urgent care plan (read only)'.

| Report Name | Performed by | Date Completed | Source |
|------------------------------|--------------|---------------------|--------|
| Urgent Care Plan (Read only) | | 24/10/2022 14:07:11 | UCP |

2

Go to the summary

The summary contains a patient's **sickle cell pain crisis management plan**.

This includes an ambulance directive and ED directive. It also includes any additional alerts for the patient, and the **ACT NOW** sickle cell guidance.

| Emergency Department directive | |
|---|--------------------------|
| Reassess pain every 30 minutes and follow analgesia ladder. | |
| ED directive drugs - 1 | |
| ED directive medication | Dihydrocodeine |
| <i>Additional info is mandatory if drug is selected</i> | |
| Additional information e.g. dose, route, frequency. | orally |
| Date drug started | 07/11/2023 |
| Additional guidance for Emergency Department clinicians | please give as explained |

3

Further information in Symptom Management

The Symptom Management section contains further information including a ward directive, plan for managing pain at home, and sickle cell modifying therapies.
